🎯 INTERESTS

Travelling | Cycling

👤 PROFILE

Aspiring Full Stack Web Developer; capable of working in a team to execute goal-oriented projects. Highly interested in getting an opportunity to observe and use my potential in favour of the company.

📁 PROJECTS

1. KindMeal.my-Clone

KindMeal.my is Malaysia's leading meat-free lifestyle platform, indulging you with delicious vegetarian meals to save animals and the environment.

Tech Stack: React, Chakra UI, React Routing, Context API, JSON-Server, Git

Features:

- Login and Logout functionality.
- Restaurant details
- Pagination

Responsibility:

- Homepage with carousel effect
- Made private routes for secure access.
- Made a directory page that contains list of restaurants.
- Applied pagination and used reqres.in API for login.

GitHub Link 

It's an individual project completed in 4 days.

2. Banggood.in-Clone

Banggood is a global leading direct-to-consumer online retailer, providing well-selected products that are highly cost-effective.

Tech Stack: HTML, CSS, JavaScript, Git

Features:

- Register and Sign in.
- Men, women, children, and electronics products.
- Sorting of products and Payment Page.
- Add and remove products from Cart.

Responsibility:

- Created the Footer of the Homepage.
- Added sorting functionality to the Product Pages.
- Helped my team to make a good UI.

GitHub Link 

A collaborative project built by 6 members in 5 days.

3. ASOS-clone

ASOS is a British online fashion and cosmetic retailer. We can buy the latest fashion products for men and women both.

Tech Stack: React, Chakra UI, React Routing, Context API, Git

Features:

- Login functionality.
- Men's and Women's separate fashion sections.

Responsibility:

- Homepage with all necessary information.
- Made a private route for secure access.
- Made men's and women's pages that contain all fashion products.
- Used reqres.in API for login.
